ABOUT ME

I am a recent Software Engineering graduate and aspiring Junior Web Developer with a keen focus on web development, specializing in familiar frameworks and technologies. Possessing a strong foundation in the field, I am driven by a passion for continuous learning and the dynamic evolution of web technology. My adept problem-solving skills enable me to simplify complex issues, aligning seamlessly with Agile methodologies. Known for my knack for innovative solutions, I am eager to contribute to impactful projects, showcasing my dedication to excellence in the realm of web development.

EDUCATION

Bachelor Degree in Natural Sciences	**License Degree in Computer Science**	**Master Degree in Software Engineering**
Omar el mokhtar High School	University of USTHB	University of USTHB
2014-2017	2017-2021	2021-2023

EXPERIENCE

Java desktop application , Project For License Degree, USTHB.
January 2021 - August 2021

Creating a Java desktop application to manage a doctor's office involves designing a user-friendly software solution with features

- **Cabinet Medical :** is a meticulously tailored desktop application, developed in collaboration with a doctor to efficiently address the real needs of medical office management. Built with Java for the back-end and JavaFX for the front-end, and employing a mySQL database, the application guarantees a seamless and secure user experience. The entire conception process, executed with precision using UML, caters to both doctor and secretary roles. "Cabinet Medical" provides a comprehensive solution for the complete management of a medical office.

web application , Project For Master Degree, USTHB.
January 2023 - August 2023

Contributed to the design, conception, and development of a web application focused on monitoring oilfield projects and facilitating interactive data analysis.

- **Seismic vision :** is a web application designed exclusively for ENAGEO, intended to support their desert missions. This application functions as an all-encompassing tool for overseeing entire missions and projects, ensuring comprehensive tracking of employees, materials, production, trucks, the mechanical workshop, and various other aspects. It offers managers continuous insight into project status by delivering daily statistics and detailed information.

PROGRAMMING LANGUAGES

- C
- Java
- Javascript
